

# THE LEGAL METROLOGY (PACKAGED COMMODITIES) RULES, 2011

## RULE-ENGINE VALIDATION REGISTER — CORRECTED FINAL 2011–2026

Audit basis: the 2011 principal Rules and the amendment/commencement documents supplied in DATA(2).zip, cross-checked against current Department of Consumer Affairs Gazette material where needed.

**Correction status:** The 230-record register was reviewed and corrected for statutory wording, effective dates, amendment references, rule ordering, future-version boundaries, validation-type consistency, and malformed/extraction fields. Historical provisions are retained where required for version selection/audit; future provisions are explicitly marked FUTURE and are not active before their commencement dates.

### Critical corrections incorporated

- Rule 3(a): cement, fertilizer and agricultural farm produce exclusion is for bags **above 50 kg**, not up to 50 kg.
- Rule 5: omitted effective **1 April 2022**.
- 2021 amendment changes to Rules 4, 6, 13 and 18 are effective from **1 April 2022**.
- Rule 6(1)(d): obsolete “or pre-packed or imported” wording removed; current declaration is month/year of manufacture.
- Rule 6(1)(e): obsolete rupee/paise rounding removed; current MRP presentation is in Indian currency inclusive of taxes.
- Rule 6(2): email address is treated as conditional where the rule says “if available”.
- 2023 electronic-product QR provisos: effective from **23 June 2023**, G.S.R. 456(E).
- Rule 6(11): State Excise proviso, equal retail-sale-price/unit-sale-price exemption, and exact-boundary manual-review logic restored.
- Rule 13(5)(ii): current wording no longer requires N/U only; current version begins 1 April 2022.
- 2025 medical-device provisos: effective on publication, **23 October 2025**.
- 2026 Rule 6(10A): active version runs 1 July 2026–30 June 2027; the 2027 substituted version starts 1 July 2027.
- G.S.R. 748(E), 24-10-2011 corrected to **G.S.R. 784(E), 24-10-2011**.
- Non-canonical validation subtypes are normalized into the declared engine schema and retained as validation\_subtype.

**Rule-engine measurement principle:** OCR can establish text presence/wording but cannot by itself establish physical millimetre dimensions. Rule 7 geometry checks require image evidence, reliable calibration/reference where possible, and manual review when image quality prevents reliable measurement.

## Corrected Rule-Engine Validation Register

Records included: **230**. Records are presented in canonical Rule 1–34 order followed by Schedules.

1. 1(1) - Short title  
rule\_id: LMPC-R1-001  
rule\_number: '1'

#### RULE Sixth Schedule

229. null - Determination of net quantity  
 rule\_id: LMPC-S06-001  
 rule\_number: Sixth Schedule  
 sub\_rule: null  
 title: Determination of net quantity  
 type: compliance  
 category: schedule  
  
 requirement:  
 field: quantity\_declaration  
 required: true  
 description: Sets out equipment/working standards and methods for determining net quantity by weight, volume, length and number, including the statistical calculations added in the 2017 framework.  
 applicability:  
 commodity\_type:  
 - packaged\_commodity  
 conditions: null  
 validation:  
 type: calculation  
 validation\_subtype: numeric  
 parameters:  
 methods: weight\_gross\_minus\_tare;volume\_specific\_gravity\_or\_direct\_measure;length\_calibrated\_steel\_tape;  
 number\_actual\_count  
 $mean = \sum(x_i)/n$   
 $standard\_deviation = exact\_schedule\_formula$   
 $corrected\_average = \bar{X} + (\sigma * C)$   
 $C = Fifth\_Schedule$   
 common\_engine\_inputs: OCR\_text,source\_image,inspection\_date,package\_type,commodity\_type  
 image\_quality\_gate: reject\_or\_manual\_review\_if\_blur,glare,occlusion,perspective\_or\_insufficient\_resolution  
 severity: HIGH  
 evidence\_required: true  
 effective\_from: '2011-04-01'  
 effective\_to: null

#### RULE Seventh Schedule

##### 230. null - Inspection forms

rule\_id: LMPC-S07-001  
rule\_number: Seventh Schedule  
sub\_rule: null  
title: Inspection forms  
type: compliance  
category: schedule  
requirement:  
description: Contains the prescribed inspection data forms, including fields for manufacturer/packer, lot, sample, MPE, gross/tare/net quantities, declared quantity, results, comments and signatures.  
applicability:  
commodity\_type:  
- packaged\_commodity  
conditions: null  
validation:  
type: manual\_review  
parameters:  
forms: Form\_A\_weight;Form\_B\_volume\_length  
fields:  
manufacturer\_packer\_address\_price\_month\_year\_lot\_sample\_commodity\_classification\_schedule\_class\_MPE\_sample\_measurements\_error\_declared\_average\_comments\_signatures\_place\_designation\_name\_time  
common\_engine\_inputs: OCR\_text,source\_image,inspection\_date,package\_type,commodity\_type  
image\_quality\_gate: reject\_or\_manual\_review\_if\_blur,glare,occlusion,perspective\_or\_insufficient\_resolution  
severity: INFO  
evidence\_required: true  
effective\_from: '2011-04-01'  
effective\_to: null  
version: 2011.0 + applicable amendments  
source:  
document: Legal Metrology (Packaged Commodities) Rules, 2011  
provision: –  
amendment: G.S.R. 202(E), 07-03-2011; applicable amendment history  
status: active

#### RULE 7 - IMPLEMENTATION SPECIFICATION FOR OCR + PHOTO VALIDATION

Step 1 - identify the Principal Display Panel (PDP). Determine the PDP area A in square centimetres using the Rule 7(4) geometry rules where

required: rectangular = height x width of the appropriate full side; cylindrical/nearly cylindrical = 40% of height x circumference; other shape = 40% of total surface or the area treated as PDP. Exclude top, bottom, can flanges, and bottle/jar shoulders and necks as stated in Rule 7(4).

Step 2 - select Table-I row. Use the authoritative intervals exactly as printed:  $A < 50$ ;  $50 < A < 100$ ;  $100 < A < 500$ ;  $500 < A < 2500$ ;  $2500 < A$ . The Gazette text uses the strict intervals  $A < 50$ ;  $50 < A < 100$ ;  $100 < A < 500$ ;  $500 < A < 2500$ ; and  $2500 < A$ . Therefore the engine must route exact boundary values  $A = 50, 100, 500$  and  $2500$  to manual\_review unless a controlling authoritative version resolves the boundary.

Step 3 - select character mode. Normal printed characters use the normal column. Characters blown, formed or molded on the container use the second column. Do not automatically classify an ordinary printed label as molded/formed.

Step 4 - measure from the image. Detect the top and bottom of the glyph/character, correct perspective where possible, and convert pixels to millimetres using a calibrated scale/reference or a known package dimension. OCR bounding boxes may locate the text but do not themselves establish millimetres. Return manual\_review if calibration is not reliable.

Step 5 - apply the corrigendum. For the first Table-I row, the blown/formed/molded minimum is 2.0 mm, not 1.5 mm. This is the 7 November 2017 corrigendum correction.

Step 6 - apply Rule 7(3). For each non-exempt character, width must be at least one-third of its height. Exceptions: numeral 1 and letters i, I and l.

Step 7 - apply medical-device and other-law gates before final PASS/FAIL. From 23 October 2025, medical-device packages use the Medical Devices Rules, 2017 for the Rule 7(2) height and Rule 7(3) width provisions where the inserted provisos apply. Rule 7(5) also means that certain declaration-size requirements remain subject to the LMPC size rules even when another law governs the same information.

Final output states. PASS only when the applicable rule version, applicability gate, PDP area, character mode, image measurement and threshold are all established. FAIL only when a measured requirement is below the applicable threshold. MANUAL\_REVIEW when any legal applicability, boundary,

calibration or image-quality input is uncertain.

#### COVERAGE RECONCILIATION

| Rule | Records |
|------|---------|
| '1'  | 3       |
| '2'  | 29      |
| '3'  | 4       |
| '4'  | 4       |
